I have worked as a Tech Support for a company in Bucharest, Romania in a group of 6 persons I learnt how to communicate, I improved my teamwork and leadership in some cases.

I have been studying HTML-CSS-JavaScript-React for 2 years, I built some websites, all different, 1 using API and complex JavaScript that won me a local hackaton. All the websites I made are responsive and have 0 bugs since I pay a lot of attention in what I'm doing. I can say I'm in love with developing.

Work History

2019-06 - 2019-08

Tech Support
A-TECH ELECTRONICĂ S.R.L., Bucharest, Romania

- Removed malware, ransomware and other threats from laptops and desktop systems.
- Patched software and installed new versions to eliminate security problems and protect data.
- Troubleshot and diagnosed problems to accurately resolve wide range of technical issues.
- Responded to support requests from end users and patiently walked individuals through basic troubleshooting tasks.
- Provided on-call support for critical software and hardware issues

Education

2019-09 - Current

High School Diploma
G.D. Romagnosi - Piacenza

Accomplishments

Hackaton Drobeta Turnu-Severin
I have won a hackaton as a team of 2 in Drobeta Turnu-Severin by developing a website using 2 different APIs, the site is based on football (football standings and matches' highlights) and was built in less than 2 days.

Regional Olympiad C# Drobeta Turnu-Severin
11th place out of 200 students.

Some personal projects.

Football Standings (2 APIs, Drobeta Turnu-Severin 2nd best ever project)
A project I've done for a hackaton that displays the match information in real time without any ads using the fetch API.

Budget App Calculator
A CRUD app which tracks your monthly expenses by adding a source of income and subtracting the expenses.

Lamborghini Website Remake
I re-created the Lamborghini site, the site includes a configurator and a price estimate.
